I am CS undergrad with a strong career objective of solving real world problems. Being in Second Year of My Undergrad Program I have worked extensively in building my skills for the same, with regular Participation in Hackathons I test my skills for the real-world challenge, I keep practicing on LeetCode to help me understand Data Structure and Algorithms better and Use Code chef to Rank Myself among the other fellow mates in this spectrum. I am currently involved with an Educational Service Startup which caters to the language and grammar needs of students in the Category of Class 1-12. My role in my Current Organization has taught me skills in domains from Marketing to Development. With an Aim to be Work in a Prestigious Organization I want my skills to out shadow my college tag.

EXPERIENCE
